Hotel Interface System

The solution for integrating your parking system to your front desk software and key encoding system is the AMC Hotel Interface System. This system allows the guest to use the same key for room & parking access throughout their duration of stay.

Current Options:

Fully integrated system, stand-alone system, and event keycard system.

Certified Interfaces:

We have certified interfaces with , , , and .

In addition we support , , , and , as well as,  key card systems, Magstripe and MIFARE RFID room keys.

Integrations:

Compatible with multiple PARCS.
