

Effectively Monitors DBA/Group Counts

On a predetermined interval the selected counts are archived to a specific table in the ScanNet Database

Operator Controls

- Time between Group Count Checks
- Archive Interval
- Beep for Group Over Limit
- Saving Credential Violators
- Which Credentials to Monitor
- Printing of Reports

Reports

- 'Maximum' Group Counts Report
- 'Standard' Group Count Archive
- 'Credential' Violator

Saved Data For Each Archive Period

- Current Count
- Minimum & Maximum Count Archived
- Credential Violators

Notification When Group Over Limit

Simple to Install & Operate

Compatible for workstations with ODBC Access to the ScanNet Database
