

## Timely Custom Alarm Notification System

Eliminates the Need to Be Present When Alarm Occurs

*Preselect Alarm for Email or Text Message Notification*

The screenshot shows the 'Alarm Form' software interface. At the top, there are tabs for 'Alarm Screen', 'Define Message Types To Watch', and 'Settings'. A green status bar indicates 'Alarm Monitoring is Running'. Below this are three buttons: 'Begin Alarm Monitoring' (green), 'Disable Alarm Monitor' (red), and 'Print Log Report' (blue). The main area contains a table with the following columns: Issue Time, Description, Device, and Device Time. The table lists 18 entries, all with the description 'Aborted By Device' and the device 'Central Cashier', all occurring at '01/26/2011 1:51 PM'. A 'Ver: 03/04/11' label is visible in the bottom right corner of the window.
