AMC - Professional Software Integrations

Contact us at (406) 442-6665 or Bernie@amc-hln.com or Ray@amc-hln.com

Hotel Interface System

The solution for integrating your parking system to your front desk software and key encoding system is the AMC Hotel Interface System. This system allows the guest to use the same key for room & parking access throughout their duration of stay.

Current Options:

Fully integrated system, stand-alone system, and event keycard system.

Certified Interfaces:

We have certified interfaces with , , , and .

In addition we support , , , and , as well as,  key card systems, Magstripe and MIFARE RFID room keys.

Integrations:

Compatible with Designa, Skidata, AVPM, Parkonect, Zeag, and T2.

Custom Projects

One of our specialties is completing custom projects for our customers.
