Hotel Interface System

Improves Customer Service

The solution to integrate your parking system to your front desk software and key encoding system to allow guests to use the same key for room and parking access. The AMC Hotel Interface System offers options for a full, stand-alone, and event keycard systems to best meet your needs.

- Certified Interfaces with Marriott, Galaxy, Opera, and Agilysys
- Compatible with multiple PARCS
- Supports many keycard systems: Saflok, VingCard, TimeLox, Ilco, and Onity using Magstripe and MIFARE RFID room keys

Monthly Parking Interface

Simple System Communications

Interfaces with parking system using a CSV file, API software, or direct database access to accomplish needs.

- Setup and update monthlies data and/or setup badges/cards
- Lookup the current prepaid balance and/or update the prepaid balance
- Pull access transactions and generate debits to a third party system, i.e. student account

KEY AMC PROJECTS

Import and update monthlies. Badges/cards will be added or updated in the system

————

Process queries for new or changed permits and add/update monthlies by card, badge and/or license plate

————

QR Code Generation program for parking access

————

Periodically extract access and revenue transactions to feed a dashboard

————

Signal-Tech Sign Integration to display available count or "FULL" by site or level

————

Create a reservation that generates a parking pass for an event

Hospital Projects

Seamlessly Maintain Access & Flexibility

From a CSV file or API integration, badges/cards will be added to the system. Any badge/card from the system that is not found in the CSV file can be set to inactive to maintain security.

- On-demand process creates files for payroll deduction based on duration of stay
- Automatic Payroll Deductions for parking determined by parking access

University & College Projects

Simplified Parking Solutions

Blackboard | Transact | CBORD CS Gold | C-CURE

Process monthly usage transactions to determine the value of parking for that day and post a deduction to their prepaid balance.

- 5 Day Pass. Set the available parking duration
- Set-up monthlies, change parking privileges and update prepaid balances from student accounts
- Process to check extracts from other systems to add/ update monthlies
- Interface for University student's prepaid accounts

💡 **We can help you upgrade your aging 3M systems (ScanNet and EFMS) to Windows 10 Pro or 11.**
